## **KNAUF Metal Framework** For Drywall Systems

### **KNAUF Metal Framework**

The metal framework for drywall systems is a set of galvanized steel profiles designed to create lightweight load-bearing structures in interior construction.

These systems offer a fast, clean, and modular alternative to traditional wet construction methods.

### **+ The Knauf Advantages**

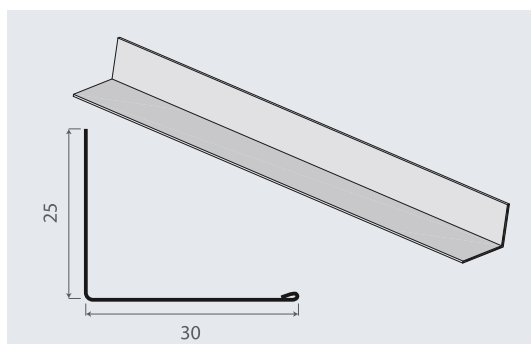

Products manufactured in compliance with the EN 14195 standard. Products tested and recommended for assemblies referencing:

- Fire resistance certificates
- Acoustic test reports
- Mechanical tests

**Build on us.**

## KNAUF Metal Framework For Drywall Systems

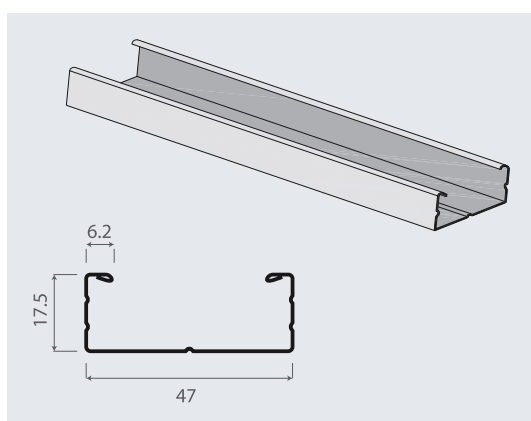

## TECHNICAL CHARACTERISTICS

### EDGE ANGLE

(L)-type profile: referred to as an edge angle, it is designed for creating the edges of ceilings and wall linings.

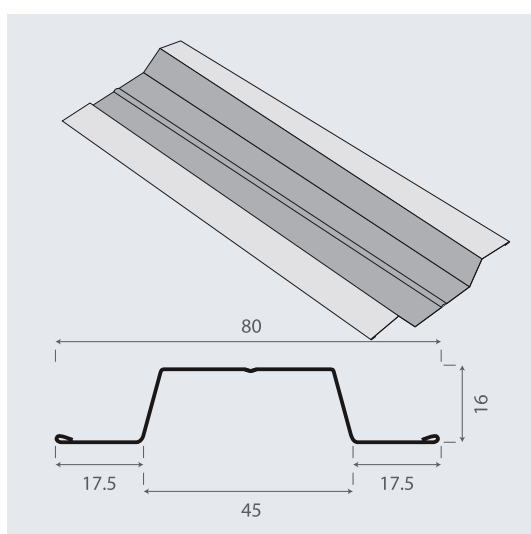

Item Code	Dimensions (in mm)				Galvanization	Fire Reaction	Packaging	
	Length	Width	Flange Height	Thickness			Bundle	Pallet
2810154	3000	25	30	0,52 ± 0,02	Z 275	A1	10 Units	1000 Units

### F47 FURRING CHANNEL

(C)-type profile: referred to as a furring channel, it is designed for constructing the framework of horizontal or sloped structures for ceilings or wall linings. The base of the furring channels serves as a support for the boards.

Item Code	Dimensions (in mm)				Galvanization	Fire Reaction	Packaging	
	Length	Width	Flange Height	Thickness			Bundle	Pallet
77700	3000	47	17	0,58 ± 0,02	Z 140	A1	10 Units	400 Units
629484	4000	47	17	0,58 ± 0,02	Z 140	A1	10 Units	400 Units
77702	5300	47	17	0,58 ± 0,02	Z 140	A1	10 Units	400 Units

### OMEGA PROFILE

OMEGA-type profile: designed for constructing the framework of ceilings and wall claddings.

Item Code	Dimensions (in mm)				Galvanization	Fire Reaction	Packaging	
	Length	Width	Flange Height	Thickness			Bundle	Pallet
713238	3000	80	16	0,58 ± 0,02	Z 140	A1	10 pièces	560 pièces
