

***CEILINGS FOR
EVERY PURPOSE***

KNAUF

Versatility, performance, and effortless integration across a multitude of spaces: Create interiors that inspire from the top down, with Knauf.

Every space tells a story, and the right ceiling sets the tone. By shaping acoustics, enhancing safety, supporting energy efficiency, and optimising indoor air quality, our ceilings do more than meet demands – they elevate experiences. All while offering limitless creative freedom in design.

Discover our multi-material ceilings portfolio shaped to meet demanding standards, with tailored and easy-to-use system solutions that bring your architectural vision to life. Whether it's sector-specific performance or sophisticated aesthetics, our ceilings seamlessly unite form and function to fulfil the unique purpose of each space.

And because performance matters, our ceilings deliver excellent acoustics, fire safety, hygiene and durability – crafted with responsibly sourced materials and energy-efficient processes to support sustainable interiors.

At Knauf, it is not just about choosing a product. It is about choosing a partner.

From concept to completion, we are the ceiling experts.

Global Ceiling Experts for all Customer Needs

From a family business to a global leader, Knauf stands for trustworthy, hands-on, and high-performing across the world.

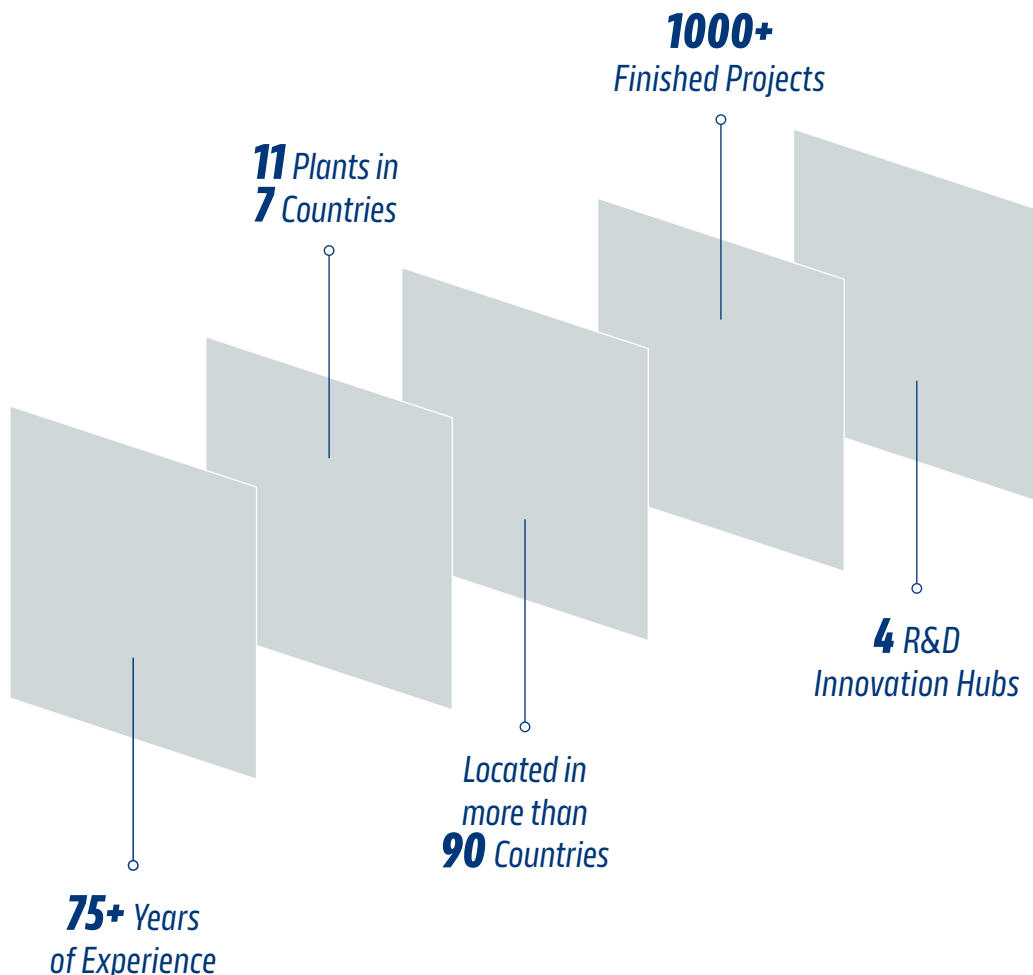

Today, more than 43,500 people in over 90 countries contribute to building materials that shape the way we live and work, from walls and façades to insulation and ceiling solutions.

As one of four strong divisions – alongside Gypsum, Insulation, and

Industries – Knauf Ceiling Solutions helps architects, contractors, distributors, and other partners unlock new possibilities overhead. Whether your project calls for standout aesthetics, acoustic excellence, or enhanced safety, our unique multi-material ceilings rise to the challenge.

This brochure is your guide to what's possible. With ceilings, and with Knauf.

Build on us.

Sustainable Interiors

Ceilings for Creative Freedom

Shape the identity, mood and character of any space from the top down. Knauf's unique range of ceiling materials includes mineral, metal, wood wool, gypsum, wood, and more. It brings your architectural vision to life, whether you seek striking geometrical patterns, organic shapes, vibrant colours, or smooth, white surfaces.

Meet the specific visual, acoustical, functional and regulatory needs of any space with tailored systems solutions – without ever compromising your creative freedom. Powered by global expertise and engineered for seamless integration, our multi-material ceilings portfolio brings form and function together effortlessly.

Wood Wool

Metal & Mesh

... and more

Mineral Solutions

Timeless and Elegant

Create modern interiors with smooth, white acoustic mineral ceilings, available in a variety of modular, open ceiling, and seamless acoustic solutions.

Metal & Mesh Solutions

Bold and Durable

Combine striking aesthetics with innovative performance, using robust metal and mesh ceilings in a wide range of colours, shapes, and perforations.

Wood Wool Solutions

Sustainable and Serene

Choose from a multitude of textures and colours for sustainable wood wool ceilings and combine elevated interiors with outstanding acoustics.

The Right Solution for Every Purpose

Gypsum Solutions

Acoustic and Aesthetic

Harmonising spaces with sound-enhancing solutions for sustainable interiors through our acoustic gypsum ceilings, offering versatile possibilities.

Wood Design Solutions

Natural and Inviting

Bring nature indoors with ceilings that mirror the authentic beauty of natural wood.

Grid Solutions

Flexible and Practical

Select from a wide range of patented ceiling grid systems that integrate seamlessly with our multi-material ceilings portfolio.

Ceilings for Tailored Solutions

Every space is unique. Our ceilings are designed to reflect that individuality, delivering a perfect balance of functionality and aesthetics. From precision-engineered tiles and panels to adaptable substructures and patented grid solutions, our systems adapt to the needs of any design. From modular suspended ceilings with exposed, semi-concealed or concealed grids, to seamless acoustic ceilings, open ceilings with canopies and baffles, or combining wall acoustic solutions – we deliver tailored systems that elevate comfort, wellbeing, and performance.

Designed for seamless integration, our systems accommodate lighting, HVAC*, and acoustics with ease, meeting the specific technical and aesthetic demands of every project. Easy to install, with outstanding stability, durability and versatility, our ceilings ensure that every space remains as practical as it is inspiring.

Modular Suspended

Adaptable exposed, semi-concealed, and concealed suspended ceilings that adapt to any space and design.

Open Ceilings

Standard, configurable, and bespoke canopy and linear ceilings, offering flexibility to create unique solutions with shapes, colours, and materials.

Seamless Acoustics

Smooth, monolithic design with a ceiling surface that quietly improves the acoustics of a room and enhances people's perception of the space.

Acoustic Wall Solutions

Achieve the perfect balance between sound performance and aesthetic design through the seamless synergy of acoustic wall and ceiling solutions.

Ceilings for High Performance

Our ceilings are designed to meet the demands of modern construction, combining unique design with advanced functionality and practicality. With excellent acoustic performance, they create quieter, more comfortable spaces that foster productivity and wellbeing. Complying with stringent fire protection standards, they provide safety for occupants, while their high light-reflectance brightens interiors naturally, and reduces the need for artificial lighting.

Creating safe, sanitary spaces in healthcare and hygiene-sensitive environments, our healthcare ceiling range helps prevent the growth of bacteria and withstands necessary cleaning. Built for durability, our ceilings retain their performance and visual appeal even under the most demanding conditions. From offices and schools to hospitals and retail spaces, our multi-material ceilings portfolio delivers innovation, reliability and lasting value – creating spaces where people can thrive.

Design Flexibility

Have your ceilings adapt to your design ambitions without compromising on technical performance.

Acoustic Excellence

Create calm, productive environments with ceilings that absorb sound and reduce noise.

Fire Safety

Protect people and property with fire-resistant ceilings, engineered to meet the most stringent requirements, ensuring safety and reliability.

Health & Hygiene

Ensure safe, hygienic environments with ceilings designed for healthcare and other sensitive spaces.

Long-Lasting Durability

Invest in ceilings built to withstand wear and tear, ensuring lasting performance and extended lifecycle value.

Easy to Use

Choose ceilings designed for quick installation, hassle-free maintenance, and effortless replacement, ensuring maximum efficiency and convenience.

Ceilings for Everyday Spaces

Ceilings shape the spaces around us, and the way we live, work, and connect. They define the way these spaces look, sound, and feel, and create environments that can foster productivity, focus, or wellbeing. From workplaces that inspire collaboration to classrooms that promote learning, from vibrant dining areas to dynamic leisure facilities, ceilings play a pivotal role in how we experience and interact with architecture.

By combining technical innovation with aesthetic sophistication, we create ceilings that go far beyond functionality. Our solutions elevate comfort, wellbeing, and performance – transforming everyday spaces into extraordinary places.

Office

Ceilings that foster focus, collaboration, and productivity.

Education

Acoustic solutions that create optimal learning environments.

Healthcare

Hygienic, calming designs for patient and staff wellbeing.

Leisure & Hospitality

Dynamic ceilings that elevate guest experiences.

Retail

Stylish, functional designs that enhance shopping environments.

Transport

Durable, efficient solutions for high-traffic areas.

Data-Centre, Industry, and more

Ceilings for Sustainable Interiors

At Knauf, the environmental impact of our ceilings is as important as their creativity, variety, and quality. That is why we are building a ceilings portfolio with an increased focus on durable, recyclable, and naturally sourced materials, from wood wool to mineral, from gypsum to metal.

Many of our key products meet leading global sustainability standards and certifications, such as Cradle to Cradle Certified® and Indoor Air Comfort Gold. Environmental Product Declarations (EPDs) are also available for an increasing number of our products, providing transparent and verified data on their environmental footprint which can be used in whole building life cycle assessments and can contribute towards Green Building Programmes including LEED v5 and BREEAM v7.

Beyond materials, our ceilings are engineered to contribute to building design features that are known to have positive impacts on the health, wellbeing, and productivity by optimising acoustics and supporting indoor air quality, visual and thermal comfort. We are committed to creating ceilings that enhance spaces and reduce environmental impact without compromising performance or aesthetics – supporting both human wellbeing and environmental stewardship.

Our Path to Circularity

By embracing the five principles of Cradle to Cradle Certified® design, we are committed to advancing the sustainability performance of our products. This approach allows us to offer you innovative solutions for sustainable design while enhancing functionality. Together, we aim to transform interior spaces into unique and inspiring experiences, paving the way for a more circular and responsible future.

Cradle to Cradle Certified®

Our comprehensive Cradle to Cradle Certified® Multi-Material Portfolio

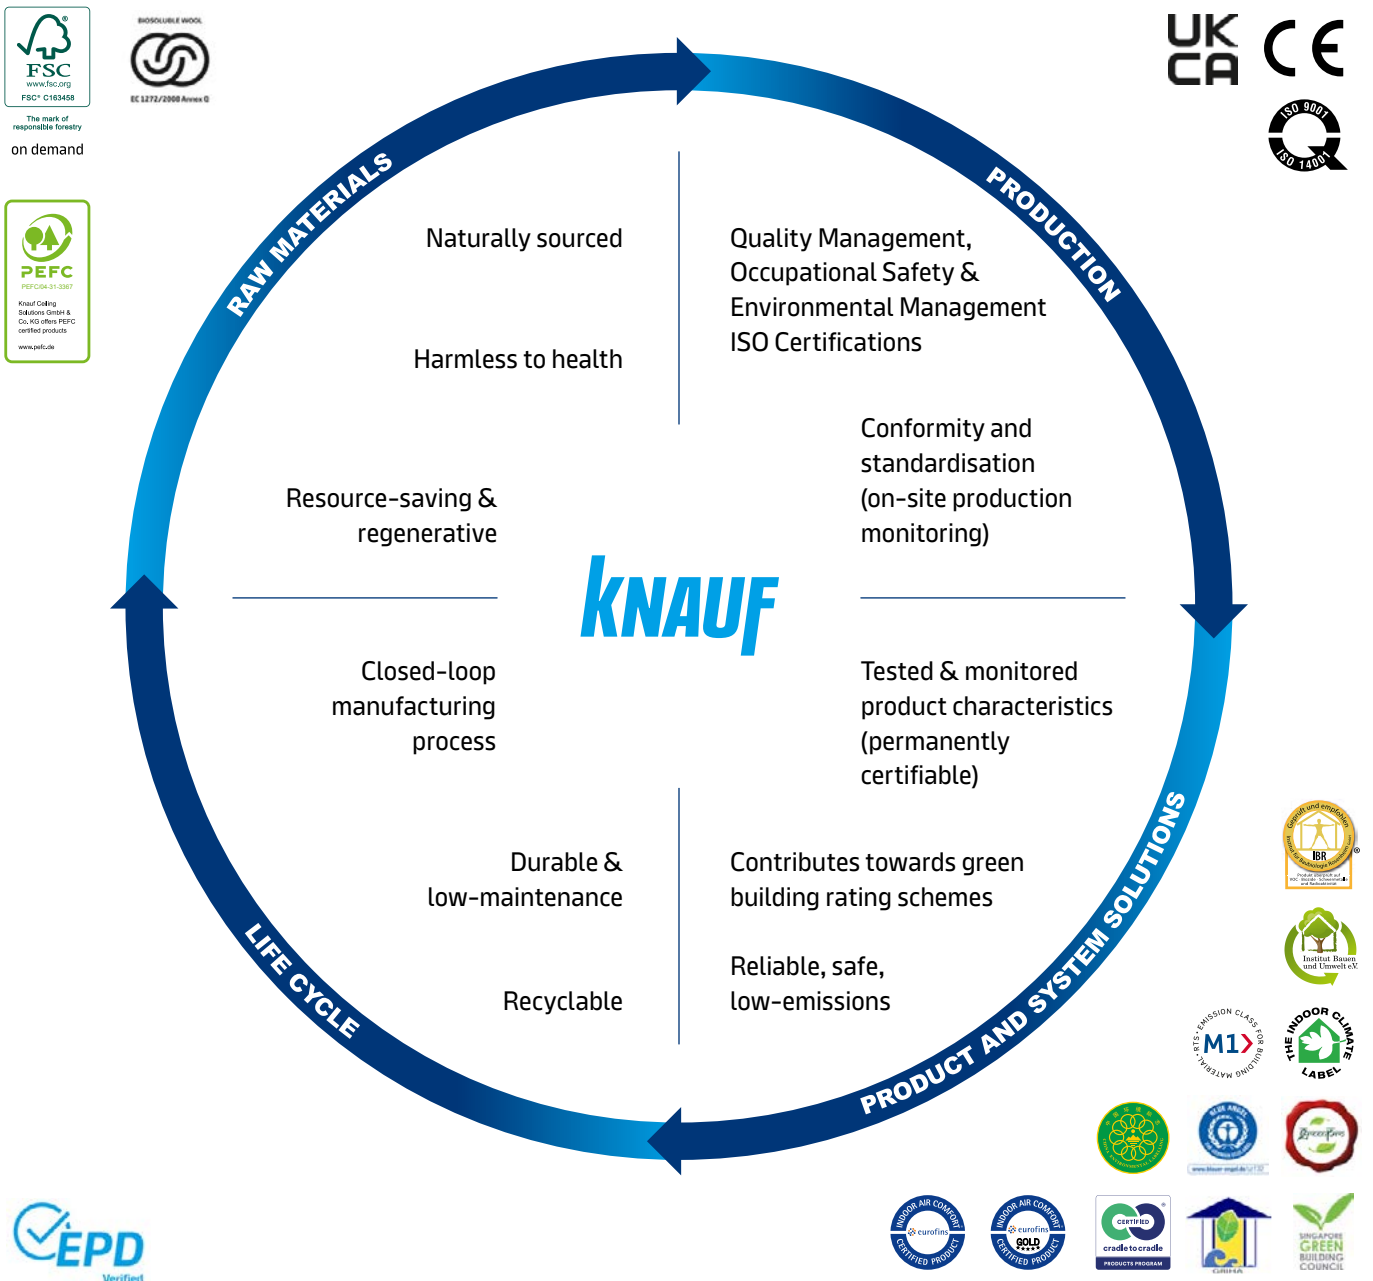

* Award for HERADESIGN® Fine, Superfine, Micro and Plano for white and natural colours.

** Award for ADAGIO, PERLA, THERMATEX® Acoustic, and THERMATEX® Alpha range.

Responsible All Round

The foundation of our approach begins with the careful selection of raw materials and a responsible production process. This is followed by testing and monitoring of product characteristics to meet global and regional sustainability requirements. And through continuous improvement, we are working to embed circularity principles to our manufacturing processes and finished products.
