

ACCESS PANEL TECHNICAL DATA SHEET

Knauf Access Panel is a gypsum board access panel design to suit the Knauf concealed ceiling system. Knauf Access Panel allows for easy above the ceiling maintenance work. It uses aluminum trimmings around its perimeter access to ensure long term durability from wear and tear.

Product Features

- Designed with a frameless feature, make it look like there is nothing on the ceiling.
- Various shapes are also available to match with the design, including Square corners and Rounded Corners
- Available in 2 types to fit with the usage, Standard type for general uses i.e. Dining room, Parlor, or Hallway and Moisture Resistant type (MoistureShield) for the area that contact with high humidity i.e. Bathroom or Kitchen.
