VAPOUR CONTROL LAYER (VCL)

PRODUCT DESCRIPTION

Reinforced vapour control membrane made of multilayer polyethylene sheet with a tear-resistant mesh with heat reflective aluminized surface, with a Sd value of 200 m, compliant with EN 13984.

HOMESEAL[®] SYSTEM

Weather membranes

- HOMESEAL LDS 0.02
- ① HOMESEAL LDS 0.04
- HOMESEAL LDS 0.04 FIXPLUS
- ② HOMESEAL LDS 0.02 UV
- HOMESEAL LDS 0.02 UV FIXPLUS

Vapour control layers

- HOMESEAL LDS 2
- HOMESEAL LDS 5
- HOMESEAL LDS 35
- HOMESEAL LDS 40
- ③ HOMESEAL LDS 100
- HOMESEAL LDS 100 ALUPLUS
- HOMESEAL LDS 200 ALUPLUS**
- HOMESEAL LDS FLEXPLUS

Tapes and sealants

- ④ HOMESEAL LDS SOLUPLAN
- ⑤ HOMESEAL LDS SOLIFIT-1
- ⑥ HOMESEAL LDS SOLIFIT-2
- ⑦ HOMESEAL LDS SOLIMUR 310

Insulation

- ⑧ KNAUF INSULATION MINERAL WOOL

SPECIFICATIONS

Water vapor permeability; Sd value (EN ISO 1931)	200 m (+60 m)
General Product Standard	EN 13984
Certification	Declaration of Performance
Thickness (EN 1849-2)	200 µm (+50 µm)
Reaction to fire (EN 13501-1)	E
Tensile Strength (EN 12311-2)	230 (L) / 230 (T) N/50 mm
Tear resistance (EN 12310-1)	110 (L) / 110 (T) N
Roll width	1.5 m
Roll length	50 m
m ² /roll	75 m ²

ADDITIONAL INFORMATION

Applications

For use as a vapour control layer and air tight membrane in timber frame construction. Designed to be used in combination with the components of the Homeseal system. Recommended solution for pitched roofs and external wall applications from the inside. It is commonly used with drywall and within roof construction.

Resistance of the material combinations to ageing

Properly performed adhesions with certified system components are highly resistant to ageing and meet the requirements of ETAG 007 (Guideline for European Technical Approval of timber building kits).

Instructions for use

Please observe the relevant installation guidelines and information provided within the packaging guidance icons. In addition, the relevant standards and recognised rules of technology apply.

Storage

Rolls should be stored on a pallet and protected from direct sunlight, rain and snow. The product does not proceed during correct storage. Do not stack pallets or rolls during transport or storage.

APPLICATION GUIDELINES

The building must be ventilated to ensure relative humidity stays below 75% during fitting.

Apply staples at a distance of 10-15 cm

Place Homeseal LDS Solifit-2, 2-sided adhesive tape, before applying the membrane

Place the Homeseal LDS Soliplan, 1-sided adhesive tape, to seal the overlap

Always apply the membrane across the bearing elements

Use some pressure to ensure the proper adhesion of the tape on the membrane

Place the membrane with a 10 cm overlap

Create airtight connections between Homeseal membranes and construction elements with Homeseal LDS Solimur glue

Use staples size 8/10

Apply Homeseal LDS Solifit-1 tape for closing the gap between ducts and membranes
