

KNAUF

PERMAROCK® Cement Board Indoor is the perfect board for exceptionally light performance, reliability and stability even in the most challenging wet and humid conditions for both wall and ceiling applications – making it ideal for everything from swimming pools and steam saunas to communal showers and kitchen areas.

Manufactured from inorganic materials and highly resistant to water and mould, PERMAROCK® Cement Board Indoor weighs just 11 kg per square metre – making it easy to handle and fast to install, with superb flexibility for curved walls too.

PERMAROCK® Cement Board Indoor

An ideal backing board for wet and humid areas

- Fully water-resistant
- Mould and mildew-resistant
- NOT deemed COMBUSTIBLE according to the test criteria specified in Clause 3.4 of AS 1530.1-1994
- Robust and reliable with high impact resistance and sound insulation
- Safe to use, hygienic and manufactured from natural materials

Processing

- Only 11 kg/m² – meaning less effort in handling, including overhead installation
- Easy to cut using a simple score-and-snap technique – no cutting room required
- No pre-drilling required
- Bending radius of 1 metre at full board size

Finishing

- Ready keyed for tiling – only one layer required for tile finish
- Supports tiling (600 mm x 600 mm) up to 50 kg/m² (For higher loads further measures apply)
- Multiple finishing options can be achieved
