Build on us.

KNAUF COLLARUS® Plaster Adhesive

TECHNICAL CHARACTERISTICS AND APPLICATION

Application Field

Knauf COLLARUS is designed for attaching decorative plaster elements (roses, cornices, etc.) to all plaster or cement surfaces.

- Not suitable for very smooth concrete unless a Knauf Betokontakt primer is applied beforehand.
- Can also be used for bonding plaster ceilings, reinforced with hemp fibers.

Composition

Knauf COLLARUS is a plaster adhesive enriched with additives to optimize adhesion and workability.

Application Instructions

Mix Preparation

1. Pour 12 L of clean water into a clean container.
2. Gradually sprinkle 25 kg of Knauf COLLARUS into the water.
3. Mix quickly until a smooth, lump-free paste is obtained.

Technical Data

- Sieve residue (500 µm): < 30%
- Setting start: 50 to 70 min
- Setting end: 60 to 80 min
- Mixing ratio: 0.5 L of water / 1 kg of adhesive

Storage

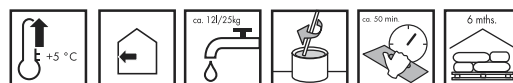

- Shelf life: 6 months in a dry place, protected from moisture.
- Recommended storage:
 - On pallets
 - Isolated from the ground

Standards and Certifications

- Compliant with EN 14496: 2006

Precautions for Use

- Plaster dust may irritate the respiratory tract and cause coughing or other issues.
- **In case of eye contact:** rinse immediately with clean water, remove contact lenses if possible, and continue rinsing. Consult a doctor if symptoms persist.
- **Disposal:** Dispose of in accordance with applicable local, regional, national, and international regulations.
