Product benefits at a glance:

Modern, Elegant Design

ELEGANZA embodies seamless, monolithic aesthetics, delivering a timeless ceiling design that meets the highest standards. With its variety of colours, shapes, and applications, the system offers unparalleled individuality and flexibility. When combined with plasterboard, it even enables the creation of curved shapes taking interior design to new heights.

Top Acoustic Performances

Beyond its distinctive aesthetic, ELEGANZA offers exceptional acoustic performance, featuring Class A sound absorption ($0.95 \alpha_w$) and effective sound attenuation (33 dB) with a panel thickness of just 25 millimetres. This combination creates a comfortable and serene environment, enhancing overall well-being.

White, Durable Ceiling Surface

With its white, ultra-fine spray texture finish in just two layers and its high light reflectance, the surface of ELEGANZA supports a natural and pleasant daylight environment. The unique airtight system prevents any filter effect, ensuring a ceiling surface that stays clean and bright throughout the product's lifespan.

Quick and Easy Installation

The ELEGANZA panel is designed to work seamlessly with the proven RAPID'FIX suspension system and Knauf CD-Profiles. Thanks to its fibre-reinforced joint filler, no additional joint tape is needed. The large format of the panel (2400x1200mm) helps minimise the number of joints required, significantly reducing installation time and material costs. ELEGANZA uses standard drywall accessories, simplifying the integration of fixtures and lighting while keeping costs down.
