Importante
Las cartas de colores de Knauf ofrecen una imagen orientativa del aspecto final de cada color; la tonalidad o el tinte final que se obtenga en obra, podría ser ligeramente diferente a la imagen mostrada en la carta de colores.

H = Índice de luminosidad
El índice de luminosidad es un parámetro técnico que indica la luminosidad y la capacidad de reflexión de una tonalidad determinada. La transformación de la luz en energía calorífica produce un calentamiento del paramento a tratar, y esto hay que tenerlo en cuenta a la hora de revesir una fachada SATE.

Los colores oscuros se calientan más que los colores claros, con lo que siempre será recomendable un revestimiento en colores claros, especialmente en el caso de fachadas SATE.

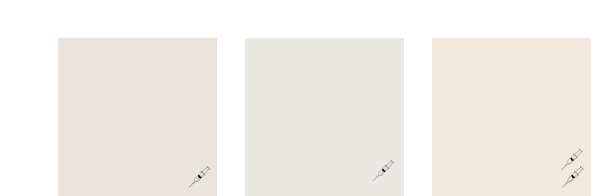

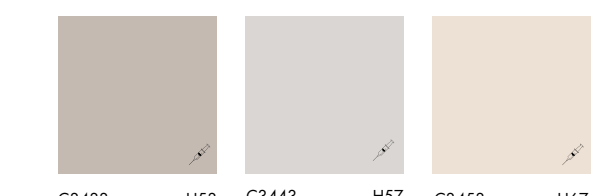

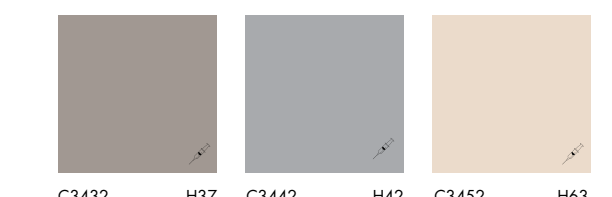

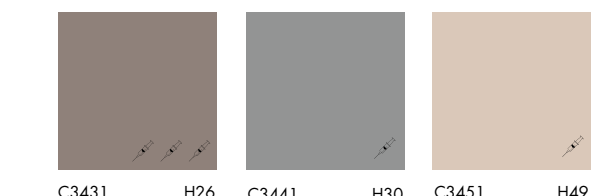

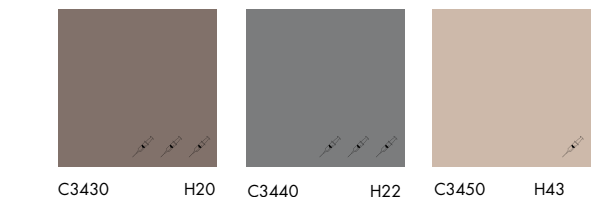

- Consejos**
- Para evitar diferencias de color, es recomendable pedir de una vez todo el material necesario para el mismo proyecto, y revestir toda una superficie con el material de una misma producción.
 - Para producto proveniente del mismo lote de fabricación, pero aplicado en distintos paramentos de diferente naturaleza, también podrían darse diferencias de tonalidades.
 - Para los productos mencionados, consultar las respectivas fichas técnicas de producto.
 - Los colores oscuros, en general, pueden perder brillo y palidecer ligeramente con el tiempo.

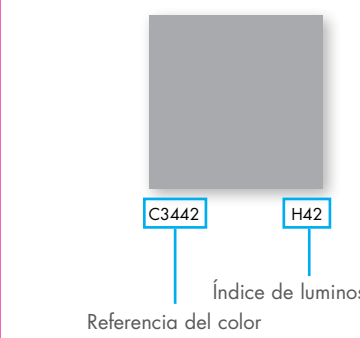

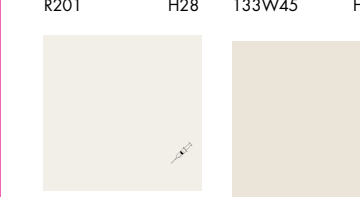

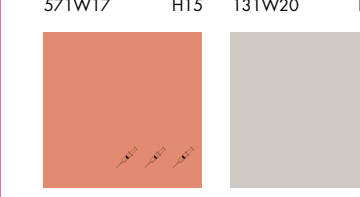

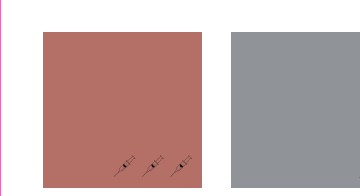

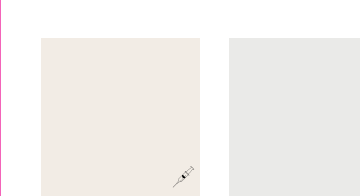

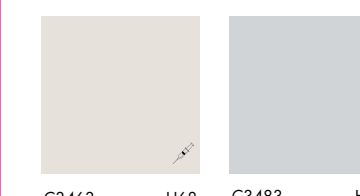

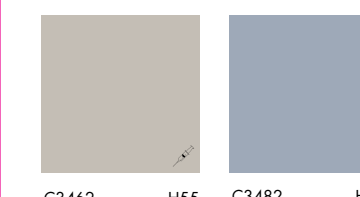

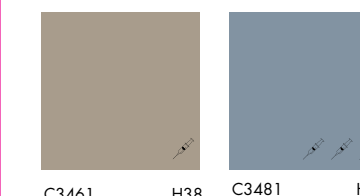

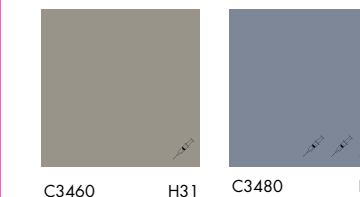

SELECTION COLORMIX

De entre las tonalidades CLASSIC, se ha escogido cuidadosamente una selección de 40 colores, que conforman la carta de colores Knauf SELECTION.

Knauf SELECTION está especialmente pensada para las jeringuillas de color Knauf ColorMix, que es una tecnología de coloración patentada exclusiva de Knauf, según un concentrado de color en forma de jeringuilla para colorear los revestimientos decorativos de fachada CONNI S y la imprimación Quarzco Pro, si fuera necesario.

KNAUF COLORMIX ESTÁ DISPONIBLE PARA TODOS LOS COLORES DE LA CARTA DE COLORES KNAUF SELECTION.
/ / / Color LIGHT - paquete de 1 jeringuilla.
/ / / / Color DARK - paquete de 3 jeringuillas.
DARK - CONNI S Dark (ver Tarifa Knauf ETIKS)
Los colores sin marcar - CONNI S Light.
