

Use the links below to access the latest EPDs for Knauf Insulation's range of products.

Environmental Product Declarations (EPDs) are a Type III environmental declaration, compliant with the ISO 14025:2018 standard. They transparently report objective, comparable, and third-party verified data about products and services' environmental performances using a full Life Cycle Assessment (LCA).

Due to verification requirements, some EPDs may include multiple products. If the product you are interested in is not currently listed, please contact us. We can advise when the EPD will be published or assist you in calculating the associated environmental impacts of your selected products using internal data.
